MyPlug

UPLOAD GUIDE FOR ADVERTISERS AND MERCHANTS

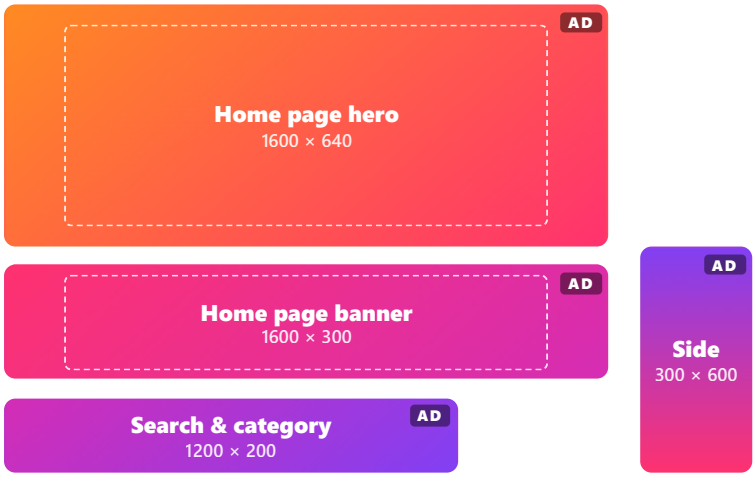

Get your images and files right the first time

The sizes, formats and file limits MyPlug checks when you upload a banner ad, a listing photo or a digital product, plus free tools to fix a file that doesn't fit.

1 Banner ads

Every banner is checked on upload. One that doesn't fit is refused, with a message saying what to change.

AD SPOT	UPLOAD SIZE	SHAPE	MIN WIDTH	MAX FILE	WHERE IT SHOWS
Home hero	**1600 × 640 px**	5 : 2	1200 px	600 KB	Rotating slide, top of the home page
Home banner	**1600 × 300 px**	16 : 3	1200 px	400 KB	Strip between home page sections
Search & category	**1200 × 200 px**	6 : 1	900 px	300 KB	Above search and category results
Side banner	**300 × 600 px**	1 : 2	225 px	300 KB	Beside results and products; not on phones

Drawn to scale. Dashed box: the safe area for words, logos and prices.

The rules the upload checks

- ✓ **Format:** JPG, PNG or WebP. GIF, PDF and Word files are refused.
- ✓ **Shape:** must match the spot to within about 8%. A larger image of the same shape, like 3200 × 1280 for the hero, is fine.
- ✓ **Width:** at least three-quarters of the listed width, so the banner doesn't look blurry.
- ✓ **File size:** at or under the KB limit. Compress the image if it's over.

Design tips

- ✓ Banners are cropped to fill the space on some screens, so keep text away from the edges.
- ✓ An **AD** label sits in the top-right corner. Leave that corner clear.
- ✓ Use a few large words, not a paragraph. The slim banners are read in about a second.
- ✓ Save photos as JPG or WebP, and flat graphics with text as PNG.

Sizes can change. MyPlug's admins can adjust ad spots. The Advertise page and your upload link always show the current size, so check them before you design.

2 Listing photos

These rules apply to products, services, Auto (vehicles and spare parts), Real Estate and your store logo.

WHAT	ACCEPTED	LIMIT	RECOMMENDED
Listing photos	JPG, PNG, WebP, GIF	4 MB per photo Up to **8 photos** per listing (set by MyPlug)	**Square, 1200 × 1200 px** The first photo is the cover on shop cards.
Real Estate	JPG, PNG, WebP	Same as above, in two groups: **exterior** and **interior** (land has one group)	Landscape 1600 × 1200 px for rooms. Use a square cover photo.
Auto	JPG, PNG, WebP	Same as listing photos	Front three-quarter view first, then the sides, interior, dashboard (mileage) and engine. For parts, show the part number.
Store logo	JPG, PNG, WebP	4 MB	**Square, 512 × 512 px** Keep a plain background.
Request photos and **chat photos**	JPG, PNG, WebP, GIF	4 MB	A clear, well-lit photo of what you mean

How your photos are shown

- ✓ Shop cards and the product gallery show photos **square**, cropped to fill. Put the item in the middle.
- ✓ MyPlug may resize big photos (to about 1600 px wide) and convert them to WebP to keep pages fast. You don't need to do this yourself.
- ✓ A photo over 4 MB is refused before any resizing happens. Shrink very large phone photos first.

Photos that sell

- ✓ Daylight or bright, even light, with no flash glare.
- ✓ A plain, tidy background, with the item filling most of the frame.
- ✓ Your own photos of the actual item, especially for used goods.
- ✗ No phone numbers or prices written on photos. Use the listing fields instead.
- ✗ No other sellers' photos or watermarks.

3 Digital downloads

KIND	FULL FILE (WHAT BUYERS GET)	PREVIEW (FREE SAMPLE)	TIPS
Video	MP4 or WebM, up to 2 GB	Same type: a short trailer	MP4 (H.264) at 1080p plays everywhere. 30–60 seconds is enough for a trailer.
Audio	MP3, M4A, OGG or WAV, up to 2 GB	Same type: a clip	MP3 at 192–320 kbps is much smaller than WAV, and buyers rarely hear the difference.
Document	PDF only, up to 2 GB	Same type: the first pages	Turn Word or EPUB files into PDF first. Compress scanned books.

The full file is kept private and only buyers can open it. The preview is public, so don't put the whole work in it.

4 Free tools to make your files fit

You don't need expensive software. These free tools, most of which run in a web browser or on your phone, cover everything in this guide.

Design a banner

Canva canva.com · web, phone	Choose *Custom size* and type the exact pixels, such as 1200 × 200. It has ready templates and exports JPG or PNG.
Adobe Express adobe.com/express · web, phone	Banner templates, quick text effects and background removal.
Photopea photopea.com · web	A free Photoshop-style editor in the browser. Use *File → New* at the exact size.
GIMP gimp.org · Windows, Mac	Full desktop editor for detailed artwork.

Resize, crop and shrink

Squoosh squoosh.app · web	Resize to exact pixels, convert to WebP or JPG and see the new KB size before you download. It's the best way to get under a banner's KB limit.
TinyPNG tinypng.com · web	Drag in up to 20 images and get much smaller PNG, JPG or WebP files that look the same.
iLoveIMG iloveimg.com · web	Crop to a square or exact size, and resize many photos at once.
Your phone Photos / Gallery app	Edit → Crop → *Square* for listing photos. Snapseed (free) adds brightness and straightening.

Video, audio and PDF

HandBrake handbrake.fr · Windows, Mac	Converts any video to MP4 using the *Fast 1080p30* preset. Trim a trailer with the start and end times.
CapCut capcut.com · web, phone	Cut a short trailer or preview clip and export MP4.
Audacity audacityteam.org · Windows, Mac	Trim a preview clip and export MP3.
iLovePDF ilovepdf.com · web	Word to PDF, compress PDF, and split out the first pages for a preview.

Check a file before you upload

Windows	Right-click the file → *Properties* → *Details* shows the width, height and size.
Mac	Open in Preview → *Tools* → *Show Inspector*, or select the file and press *Cmd + I*.
Phone	Open the photo and swipe up, or tap ⓘ, to see its resolution and file size.
Size check	1 MB = 1024 KB. A 400 KB banner limit means the file must show 400 KB or less.

5 Documents for verification

WHAT	ACCEPTED	LIMIT
Business licences and certificates, courier ID documents, proof of payment	PDF or a photo (JPG, PNG, WebP)	4 MB
Courier face photo, parcel collector photo	Photo (JPG, PNG, WebP)	4 MB

These are stored privately and seen only by MyPlug staff. Make sure every corner of the document is in the photo and the text is readable.

6 Before you upload

Quick checklist before you upload a banner

- ✓ Exact size for the spot, or the same shape and larger
- ✓ Under the KB limit (use Squoosh or TinyPNG)
- ✓ Top-right corner clear for the AD label
- ✓ JPG, PNG or WebP
- ✓ Text inside the safe area
- ✓ Link and headline double-checked

Quick checklist before you post a listing

- ✓ JPG, PNG or WebP, 4 MB or less each
- ✓ Best photo first (it's the cover)
- ✓ No phone numbers or prices on the photos
- ✓ Square photos, item in the middle
- ✓ Real photos of the actual item
- ✓ Digital: a preview of the same file type

> These tools are made by other companies and aren't part of MyPlug. They're suggestions only. Check each one's terms before uploading private documents to it.
